

KEERTHI V

Senior QA Engineer | Selenium (Java) Automation | API Testing | Mobile (Appium) | ISTQB Certified

+91-8778616729 | keerthivenkataraman@gmail.com | Chennai, India | Open to Remote

PROFILE SUMMARY

Senior QA Engineer with 6+ years of manual and automation testing across web, API, and mobile apps in Restaurant Tech, E-commerce, and FinTech. Strong in requirement analysis, test planning, test case design, and functional, exploratory, and regression testing, with hands-on Selenium WebDriver (Java) + TestNG framework development, API testing (Postman, RestAssured), and working experience in Appium. ISTQB Advanced Test Analyst who functioned as QA Team Lead for a 6-member team and drove a 70% cut in regression cycle time. Self-driven, clear written communicator. Seeking remote Manual / Automation QA roles.

CORE SKILLS

Manual Testing: Test Planning, Test Case Design & Execution, Requirement Analysis, Functional, Exploratory, Smoke, Sanity, Regression, Integration & End-to-End Testing, Cross-Browser & Cross-Device Testing

Test Design & Defects: Boundary Value Analysis, Equivalence Partitioning, Decision Tables, Defect Lifecycle, RCA

Web Automation: Selenium WebDriver (Java), TestNG, POM, Data-Driven Testing, BDD (Cucumber), Selenium Grid

Upskilling: Playwright (TypeScript) – basic knowledge, actively learning

API Testing: Postman, RestAssured, JSON/XML Validation

Mobile Automation: Appium (Android & iOS), TypeScript, AWS Device Farm

Database & Performance: SQL, MySQL, Apache JMeter (Load & Stress Testing)

Tools & CI/CD: Jira, TestRail, Confluence, Git, Jenkins, Miro, GitHub Copilot

Languages & Process: Java, TypeScript | Agile & Scrum, SDLC & STLC

Leadership: Team Leadership (6 QA engineers), Test Strategy, Mentoring, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Toast Tab Private Limited

Apr 2021 – Oct 2026

(formerly xtraCHEF Technologies India Pvt Ltd, acquired by Toast in June 2021)

QA Engineer II (formerly Senior Software Engineer – QA, following Toast's title realignment)

Functioned as QA Team Lead from 2025

- **Owned manual and automated testing for web, API, and mobile releases**, writing test plans and test cases in TestRail and executing functional, smoke, sanity, exploratory, regression, and end-to-end tests for weekly releases.
- **Functioned as QA Team Lead for a 6-member team from 2025**, owning test strategy, sprint planning, daily stand-ups, and defect triage, plus a weekly Friday Bug Bash to surface edge-case defects ahead of release.
- **Architected the Selenium WebDriver (Java) automation framework** with TestNG, POM, and data-driven testing, plus RestAssured for API validation of microservices-based features, integrated into Jenkins CI/CD.
- **Drove a 70% reduction in regression cycle time** by automating repetitive manual regression suites and keeping the framework maintainable.
- **Managed the defect lifecycle in Jira**, logging clear, reproducible defects with steps, evidence, and severity, performing root-cause analysis, and reporting release quality to stakeholders.

Quality Control Editor | Checktronix India Pvt Ltd

Oct 2012 – Nov 2013

- Designed and maintained automated web robots for large-scale data aggregation, ensuring 100% data accuracy against client specifications.

PRIOR EXPERIENCE (NON-IT)

IT Teacher | Lords International School (ICSE)

Aug 2019 – Mar 2021

English & Computer Teacher | Srimathi Sundaravalli Memorial School (CBSE)

Jul 2015 – Jul 2019

KEY ACHIEVEMENTS & AWARDS

ToastPilot – Autonomous QA Agent — Top 10 of 270+ Globally

- Ranked Top 10 out of 270+ participants in Toast's global internal hackathon for architecting an autonomous, AI-driven QA agent for Toast's iOS retail inventory app.
- Designed and built the agent from scratch — using AI-assisted dev tools (Claude, Cursor) — including the test pipeline, defect detection logic, and reporting dashboard; delivered with a working demo and documentation.

KEY PROJECTS

Unified Inventory — Toast Retail Team (iOS App)

- Owned end-to-end QA strategy, manual and automated testing, and release quality for Toast's Unified Inventory iOS application on the Retail team — the same platform ToastPilot's AI QA agent was built to test (see Key Achievements).
- Built and maintained 83% automation coverage across 5 of 6 core modules (cycle counting, invoice scanning, product catalog, low-stock notification, and stock adjustment), supporting a weekly production release cadence (Wednesday code freeze, Monday release via TestFlight beta).
- Diagnosed the root causes behind increased production defects, including lack of dedicated QA ownership and compressed testing windows.
- Authored a Test Strategy & Quality Plan introducing a round-robin On-Call QA model, mandatory pre-merge dev testing, reinstated TestRail tracking, and release-timeline discipline — improving defect detection before production.

Web & API Automation Framework — xtraCHEF Platform (Toast Tab)

- Architected a Selenium (Java) + TestNG + RestAssured framework for the xtraCHEF invoice/AP automation platform — covering invoice processing, purchasing, and inventory — using POM for maintainability, integrated into Jenkins CI/CD.

Mobile Automation Framework — xtraCHEF iOS & Android App (Toast Tab)

- Designed and implemented the Appium + TypeScript automation framework for xtraCHEF's Android and iOS applications through 2025, enabling scalable cross-device execution using AWS Device Farm and Selenium Grid.

Shelf-to-Sheet — Toast International Team (iOS Inventory App)

- Owned end-to-end manual QA and mobile automation for Shelf-to-Sheet, an iOS inventory management application for Toast's International team, using Appium and TypeScript.

CERTIFICATIONS

- ISTQB Certified Tester – Advanced Level, Test Analyst V3.1 (April 2025)
- Selenium WebDriver with Java (January 2021)
- Mobile – Appium Automation Tester (August 2023)
- Generative AI for QA Engineers (June 2025)

EDUCATION

M.Sc. Information Technology — MOP Vaishnav College for Women, Madras University (2011, 86%)
